PROFILE

I am an result-oriented Front-end/React engineer. I am completing my master's degree in biological sciences. For a year now I have been studying front-end, and at the moment I am developing sites for an online store on Shopify and created a site on Tilda. I have confident knowledge of HTML & CSS, JavaScript, React, Redux. Looking for an entry-level position in the company to use my programming skills, troubleshoot complex issues and help completing projects on time.
